

System Wash

Manufacturers of Quality High Pressure Cleaning Equipment

AquaPro Range

Motor

All **AquaPro** units feature a direct drive four-pole electric motor running at 1400 – 1450 RPM, incorporating squirrel cage rotor construction and bi-directional cooling fan providing maximum efficiency.

Pump

All **AquaPro** machines industrial pumps feature-plunger system, long and oil immersed bearings are constructed of ensuring Maximum anti whole range is equipped **System**. This comprises

are fitted with top quality ing a 3-piston ceramic life hardened crankshaft ing profile. All the wetted brass or stainless steel corrosion properties. The with the unique **F.S.A.** of a special flow sensitive

Regulator, which ensures pressure does not remain trapped in the high-pressure line during bypass operation or shut down mode. Low voltage controls (24v) have been fitted as standard to achieve maximum operator safety, complemented by a fully automated, timed total shut down system with mains interruption release and thermal overload protection for motor.

AquaPro machines are superb, providing long-term reliability, durability and optimum performance, an investment that will serve you for many years to come.

Model No	Pressure	Flow	Power	Run load		RPM	Dimensions	Weight
	Bar	LPM	Volts	Amps	Kw			Kilos
AquaPro 1	90	12.5	230V	13	2.3	1450	L = 830 W = 590 H = 710	68
AquaPro 3	190	15	400V	3 x 13	5.6	1450		80

All **AquaPro** Machines are Supplied complete with 9 Metres of 2 wire quality high pressure hose, heavy duty trigger gun and 900mm lance.

Options

Remote switching pad - High or Low pressure chemical - Key over-ride on all functions

Connections

Inlet: 1/2" and 3/4" hose tail - Quick release at rear
 Outlet: Quick release at front
 Power: 6 Metres Cable at front

SystemWash

Manufacturers of Quality High Pressure Cleaning Equipment

AquaPro Range

The **AquaPro** Range has been constructed using the very latest computer aided design and manufacturing systems available, in our own Yorkshire factory. As a result of this technology, all the service and repair parts are very accessible and easy to maintain with no compromise to the striking appearance. The **AquaPro** is a heavy - duty, no - nonsense machine and must not be confused with lower level imported equipment, at SystemWash we design our machines through experience and every machine is assembled to the same exacting high standard and tested thoroughly before it leaves our factory; quality, reliability and value are the key factors.

Quality Without Compromise

Built onto a heavy gauge powder coated Zintec Steel chassis with twin axles and 10" wheels for durability and stability **AquaPro** features a large capacity on board water tank with type A air gap and a WRAS approved hi - flow ball valve to BS 1212.

The whole machine is wrapped with a polished 304 grade stainless steel cover; stainless steel plays an important role in **SystemWash** machines because of its durability, rigidity and anti corrosion properties.
