Manufacturers of Quality High Pressure Cleaning Equipment

## AquaStorm Range

### Motor

All **AquaStorm** units feature a direct drive four-pole electric motor running at 1400 – 1450 RPM, incorporating squirrel cage rotor construction and bi-directional cooling fan providing maximum efficiency.

### Pump

All **AquaStorm** machines are fitted with top quality industrial pumps featuring a 3-piston ceramic plunger system, long life hardened crankshaft and oil immersed bearing profile. All the wetted parts are constructed of brass or stainless steel ensuring Maximum anti corrosion properties. The **AquaStorm** can be specified with an optional timed total shut down system and the whole range features mains interruption release and thermal overload protection for motor.

**AquaStorm** machines are superb, providing long-term reliability, durability and optimum performance, an investment that will serve you for many years to come.

Handle Dropped

Optional AquaBowler

Model No	Pressure	Flow	Power	Run load		RPM	Dimensions	Weight
	Bar	LPM	Volts	Amps	Kw		L = 600 W = 480 H = 840	Kilos
AquaPro 1	90	12.5	230V	13	2.3	1450		47

All **AquaStorm** Machines are Supplied complete with 9 Metres of 2 wire quality high pressure hose, heavy duty trigger gun and 900mm lance.

### Options

Please see full list of options in main price list.

Local Dealer

### Connections

Inlet: 1/2" and 3/4" hose tail -  
 Outlet:  
 Power:

Quick release at Side  
 Quick release at Side  
 6 Metres Cable at Rear

Manufacturers of Quality High Pressure Cleaning Equipment

## *AquaStorm Range*

The **AquaStorm** cold water pressure washer has been constructed using the very latest computer aided design and manufacturing systems available, in our own Yorkshire factory. As a result of this technology, all the service and repair parts are very accessible and easy to maintain with no compromise to the striking appearance. The **AquaStorm** is a heavy - duty, no - nonsense machine and must not be confused with lower level imported equipment, the same pump and motor combination is fitted to this machine as is fitted to all our equipment. At SystemWash we design our machines through experience and every machine is assembled to the same exacting high standard and tested thoroughly before it leaves our factory; quality, reliability and value are the key factors.

### *Quality Without Compromise*

Built onto a 3mm powder coated Zintec Steel chassis with heavy axle and 10" pneumatic wheels for durability and stability **AquaStorm** features a large front anti scuff locking rubber castor wheel which swivels through 180 degrees for excellent maneuverability. The handle drops down to enable the machine to be loaded into confined areas for transportation.
